

## About AbbVie

AbbVie (NYSE: ABBV) is a global, research-based biopharmaceutical company formed in 2013 following separation from Abbott Laboratories. The company's mission is to use its expertise, dedicated people and unique approach to innovation to develop and market advanced therapies that address some of the world's most complex and serious diseases. AbbVie employs approximately 25,000 people worldwide and markets medicines in more than 170 countries.

### We are looking for a

#### **Senior Veterinary Pathologist (all genders) - (unlimited / fulltime)**

Enable discovery and development of new drugs by supporting our pathology unit within the department of Preclinical Safety in Germany.

#### **Key Responsibilities:**

- You ensure scientific evaluation and interpretation of pathology data by concurrent adherence to international regulatory guidelines.
  - Tasks include:
    - providing input to study protocols,
    - supervise necropsies,
    - perform histopathological examinations in rodent and non-rodent studies, and correlate these findings with necropsy, organ weight and clinical pathology findings
    - authoring reports for non-clinical toxicology studies
    - conduct formal peer reviews
  - You will provide scientific and technical expertise to project teams (by serving as a toxicology project representative) and thereby closely interact with Neuroscience Discovery
  - You will participate in the scientific development and establishing of new methods and contribute to publication and communication whenever possible.
  - You will ensure close interaction, collaboration, and communication within the Global Pathology Organization
  - Finally, you will strive continuously for improvement of criteria for efficiency, quality, and safety.

#### **Education and qualification:**

- PhD or equivalent in veterinary medicine and certified qualification in veterinary pathology
- Board certification by the European or the American College of Veterinary Pathologists (DECVP or DACVP) or equivalent
- Ideally substantial expertise in toxicologic or investigative pathology
- Excellent oral and written communication skills in English
- High level of interpersonal skills, such as strong leadership and communication skills, strong team player
