

Senior Toxicologic Pathologist (201503)

OUR COMPANY

At Boehringer Ingelheim we develop breakthrough therapies and innovative healthcare solutions in areas of unmet medical need for both humans and animals. As a family owned company, we focus on long-term performance. We believe that, if we have talented and ambitious people who are passionate about innovation, there is no limit to what we can achieve; after all, we started with just 28 people. Now, we are powered by 50,000 employees globally who nurture a diverse, collaborative and inclusive culture.

THE POSITION

Take advantage of your scientific expertise and work experience and apply it to key challenges in the drug development process. Contribute actively to the success of new therapeutics to help improve the quality of human life.

Boehringer Ingelheim is a globally leading and family-owned pharmaceutical company with a substantial commitment to innovative Research and Development. The campus in Biberach an der Riss is Boehringer Ingelheim's most significant R&D site for human pharmaceuticals. It is located in Southern Germany, not far from the Alps, the Lake of Constance, Stuttgart and Munich.

The position is available within the Pathology Group of our Nonclinical Drug Safety Department in Biberach and offers a broad range of challenging tasks, assisting the Group Manager, with focus on the following areas:

Tasks & responsibilities

- In your new role, you contribute your profound and broad toxicologic pathology expertise to the preclinical development of drug candidates.
- You guide trouble-shooting with classical methods and innovative strategies in case of unexpected study results.
- Furthermore, you act as study pathologist and perform peer reviews of in-house studies and studies performed at CROs.
- You assume delegated responsibility for histopathology peer review and study report review of carcinogenicity studies.
- The training and advice of younger colleagues within the group is also your responsibility.
- You contribute to interdisciplinary non-clinical developmental projects and to phase-transition and regulatory submission documents.
- In addition, you establish and maintain a network with other company sites, academia and industry in order to achieve optimum investigative strategies and scientific results within the preclinical development process.

Requirements

- PhD. in Veterinary Medicine or a related field, alternatively master's degree with long-term professional experience in an international environment.
- Board certified ECVP or ACVP or equivalent
- At least several years of professional experience in Toxicologic Pathology in a GLP environment, including carcinogenicity studies
- Excellent knowledge of relevant regulatory standards in toxicology and related fields of drug development
- Experience in non-clinical development projects highly desirable
- Strong scientific interest and analytical capacity, target- and strategy-oriented work attitude
- Willing to accept new challenges, flexible in mind, autonomous and reliable
- Open-minded personality and strong team player

WHY BOEHRINGER INGELHEIM?

This is where you can grow, collaborate, innovate and improve lives.

We offer challenging work in a respectful and friendly global working environment surrounded by a world of innovation driven mindsets and practices. In addition, learning and development for all employees is key, because your growth is our growth. We also offer a competitive salary, generous amount of vacation time, and numerous benefits towards your wellness & financial health and work-life balance. Plus, an onsite gym (Ingelheim), in-house doctor and best-in-class cafeterias and coffee bars to keep you energized and healthy.
