

I'm inspired

by our ability to build
better lives – and I share
that inspiration with those
around me

Senior Principal Scientist Histopathology (219090) ([click to apply](#))

OUR COMPANY

At Boehringer Ingelheim we develop breakthrough therapies and innovative healthcare solutions in areas of unmet medical need for both humans and animals. As a family owned company, we focus on long-term performance. We believe that, if we have talented and ambitious people who are passionate about innovation, there is no limit to what we can achieve; after all, we started with just 28 people. Now, we are powered by 50,000 employees globally who nurture a diverse, collaborative and inclusive culture.

THE POSITION

Leading the Science. Today. Together.

Take advantage of your experience in the field of histopathology and actively shape a sustainable Research project pipeline to assure long-term profitability of a globally leading and family-owned pharmaceutical company.

As senior expert for histopathology you give guidance to pathologists and scientists in other disciplines and functions. You combine an innovative, proactive mindset with scientific expertise in histopathology. In addition, you are a driver of drug discovery, experienced in processing digital pathology data and in taking advantage of cutting-edge technologies.

As Senior Principal Scientist you are responsible for histopathological assessments enabling the development of tissue-based target and biomarker discovery strategies. Be part of our Innovation Unit at Boehringer Ingelheim and join our Department Drug Discovery Sciences in Research located at our biggest research site in Biberach an der Riss.

Discover our Biberach site: xplorbiberach.com

Tasks & Responsibilities

- As Senior Principal Scientist you lead the Histopathology laboratory staffed with a team of highly motivated technicians and scientists
- You are responsible for the evaluation and assessment of histology and histopathology related tasks from all research departments
- For this, you collaborate with scientists from several disciplines like (cancer) immunology, ophthalmology, neuroscience, cardiometabolic- and respiratory diseases
- By participating in global research project teams, you work on the validation of disease animal models, the treatment efficacy of compound testing in in-vivo / in-vitro systems as well as on the evaluation of potential side effects.
- It is your responsibility to establish, continuously improve and automatize technologies for our state-of-the-art pathology lab responsible for the evaluation of targets / biomarkers in human, xenograft and animal model tissue samples.
- Using Artificial Intelligence supported techniques such as Immunohistochemistry, Multiplex-Immunohistochemistry and Immunofluorescence is part of your daily work
- You set up and lead international academic collaborations and initiatives and peer review research conducted at academia and CROs.

Requirements

- Either completed Master studies in life science, medicine, or veterinary studies, alternatively a completed vocational training with longtime professional experience in an international environment.
- A PhD, MD and / or DVM / VMD with post graduate training in veterinary- or medical pathology would be highly advantageous
- Extensive expertise as toxicologic or medical pathologist in the pharmaceutical industry
- FELASA C allowance to supervise animal experiments
- Proficient in interpreting morphology of normal / diseased human tissue and disease animal models in the fields of (cancer) immunology, ophthalmology, neuroscience, cardiometabolic- and respiratory diseases.
- Team worker with sound communication and presentation skills in English paired with the ability to work in a global environment
