

I'm inspired

by our ability to build better lives – and I share that inspiration with those around me

(Senior) Principal Scientist Histopathology (219090)

OUR COMPANY

At Boehringer Ingelheim we develop breakthrough therapies and innovative healthcare solutions in areas of unmet medical need for both humans and animals. As a family owned company, we focus on long-term performance. We believe that, if we have talented and ambitious people who are passionate about innovation, there is no limit to what we can achieve; after all, we started with just 28 people. Now, we are powered by 50,000 employees globally who nurture a diverse, collaborative and inclusive culture.

THE POSITION

Leading the Science. Today. Together.

Take advantage of your experience in the field of histopathology and actively shape a sustainable Research project pipeline to assure long-term profitability of a globally leading and family-owned pharmaceutical company.

As senior expert for histopathology you give guidance to pathologists and scientists in other disciplines and functions. You combine an innovative, proactive mindset with scientific expertise in histopathology. In addition, you are a driver of drug discovery, experienced in processing digital pathology data and in taking advantage of cutting-edge technologies.

As Senior Principal Scientist you are responsible for histopathological assessments enabling the development of tissue-based target and biomarker discovery strategies. Be part of our Innovation Unit at Boehringer Ingelheim and join our Department Drug Discovery Sciences in Research located at our biggest research site in Biberach an der Riss.

Curious about what Biberach has to offer in addition to being a front-runner in science? Discover our Biberach site: xplorebiberach.com

Tasks & responsibilities as Principal Scientist

- As Principal Scientist you lead the Histopathology laboratory in Discovery Research Germany staffed with a team of highly motivated employees.
- You are responsible for the evaluation and assessment of histology- and histopathology related questions and tasks from all research departments such as (cancer) immunology, ophthalmology, neuroscience, cardiometabolic and respiratory diseases.
- As team member in global research project teams, you support target / biomarker discovery, validation of disease animal models, treatment efficacy of compound testing in in-vivo / in-vitro systems as well as the evaluation of potential side effects therein.
- To this end, your lab collaborates with Molecular Pathology and Digital Image Analysis experts.
- You are responsible for the establishment, continuous improvement, and automatization of technologies for a highly specialized and state-of-the-art histopathology laboratory for the evaluation of targets / biomarkers in human-, xenograft- and animal model tissue samples.
- You peer review research conducted at academia and CROs.

Additional tasks & responsibilities as Senior Principal Scientist

- You represent a key team member in global research project teams
- You set up and lead international academic collaborations and initiatives and peer review research conducted at academia and CROs.

Requirements as Principal Scientist

- Master's degree in life science, medicine- or veterinary studies, alternatively completed vocational training with longtime professional experience in an international environment. A PhD, MD, or DVM with post graduate trainings in veterinary- or medical pathology would be advantageous
- Several years of experience as a research-, toxicologic- or medical pathologist in the pharmaceutical- or biotech industry
- Excellent interpersonal-, communication- and presentation skills in English paired with the ability to work in a global team environment

Additional requirements as Senior Principal Scientist

- PhD, MD, or DVM with post graduate training in veterinary pathology or medical pathologist
- Experience in leading people
