INTERNSHIP IN CLINICAL OR ANATOMIC PATHOLOGY IN THE PHARMACEUTICAL INDUSTRY FOR TRAINEES/RESIDENTS

- GSK and AstraZeneca in collaboration with the BSTP are offering short duration internships in laboratory animal clinical or anatomic pathology in their departments of pathology/ preclinical development.
- The program aims to provide an introduction to the toxicological and experimental pathologist's daily duties (including technical, scientific and communication) and an understanding of how pathology data fit into drug development. There may also be the possibility to contribute to a short project.
- The position will involve exposure to short term toxicological studies (including lone reading and review with experienced pathologists), training material (EPSR slides), efficacy and investigative studies, special histopathological techniques (including electron microscopy, in-situ- hybridisation, immunohistochemistry and image analysis among others) and data handling experience (comprehensive pathology style). An interest in toxicological anatomic or clinical pathology as a career, strong motivation and a proactive approach will be required from successful applicants.
- This program is offered on a 1 or 2 week basis and is intended for veterinary graduates currently in a pathology PhD, training or residency programme.
- Some financial assistance may be available.
- Application is now open for internships **at either GSK in Hertfordshire or AstraZeneca in Cambridge in the second half of 2019**. For further information do not hesitate to contact us by email. To apply, please return by email CV and supporting letter to TQH29436@gsk.com by 26th April, 2019 quoting "UK Pathology Internship".
