

SENIOR VETERINARY PATHOLOGIST

Labcorp Drug Development has career opportunities for Senior Veterinary Pathologists at our Harrogate and Eye sites. The Pathologist's primary responsibility is reporting and interpreting pathology data from Labcorp Drug Development clinical studies. Furthermore, the incumbent has a responsibility to independently conduct all work in compliance with applicable regulatory requirements, and specifically those regulations (GLP) specified in the study plans, protocols, or work agreements governing the work in which they are involved.

Additional key responsibilities include;

- Provide consult on protocols regarding all aspects of pathology requirements in toxicity studies
- Supervise necropsies to ensure proper dissection description, sampling and preservation of tissues in accordance with the protocol, and advise on the description and recording of gross abnormalities.
- Perform the histopathology microscopic evaluation and interpretation of tissue sections from animals exposed to test materials and correlate these findings with necropsy, organ weight and clinical pathology findings.
- Evaluate, report and interpret necropsy and histopathology data under the general guidance of a senior or principal pathologist. Communicate the significance of pathologic findings to study directors, clients and other individuals.
- Maintain working relationships with internal and external clients in order to ensure client satisfaction with the Pathology department deliverables. Liaise with pathologists, study directors, report production personnel.
- Assist and advise study directors, and operational personnel in necropsy and histology in the scientific and operational aspects of the data generation and review. Supervise, peer review and advise pathologists in training in the pathology department.

Qualifications:

- Veterinary degree or equivalent
- PhD in Pathology, Toxicology, or related life sciences discipline a plus
- 3+ years of experience in pathology with a pharmaceutical, biotech, or CRO preferred
- Previous experience in toxicologic pathology advantageous
- Ability to work independently
- Demonstrated expertise in evaluating pathology data
- Excellent verbal and written communication skills
